

TRADE HIGHLIGHTS

On April 18, the United State Trade Representative (USTR) announced that an agreement had been reached to fully reopen South Korea's market to U.S. beef exports consistent with international standards and the World Organization for Animal Health (OIE) guidelines. South Korea closed its market to U.S. beef and beef products after the initial case of bovine spongiform encephalopathy (BSE) was found in the U.S. Prior to this, South Korea was the third largest export market for U.S. beef and beef products. South Korea partially reopened its market to boneless beef from cattle less than 30 month of age in January 2006 but the market closed again in October 2007. The new agreement is set to be in effect mid-May and will eventually fully permit all U.S. beef and beef products from cattle of all ages to be exported to South Korea. To read the full press release, visit the USTR website at <http://www.ustr.gov/>.

The USDA National Agricultural Statistics Service (NASS) released its *Livestock Slaughter* report on April 25. According to the numbers, during the first quarter of 2008, U.S. cattle slaughter equaled 8.13 million head. This was 3.6 percent less than the previous quarter but was 1.5 percent more than a year ago. Beef production during the first quarter fell 5.4 percent from the previous quarter to 6.28 billion pounds. However, this was 2.3 percent more than a year ago. Live cattle weights at the end of March were 17 pounds heavier than a year ago, amounting to 1,278 pounds. Meanwhile, during the first quarter of 2008, U.S. hog slaughter totaled 29.35 million head. This was down 2.6 percent from the previous quarter but was up 11.0 percent over a year ago. Accordingly, pork production during the first quarter fell 2.2 percent from the previous quarter to 5.98 billion pounds. However, this was 11.7 percent higher than a year ago. At the end of March, live

hog weights equaled 271 pounds, unchanged from a year ago. Meanwhile, during the first quarter of 2008, U.S. sheep and lamb slaughter equaled 622.6 thousand head. This was down 6.6 percent from the previous quarter and was down 6.5 percent from a year ago. U.S. lamb and mutton production during the first quarter totaled 44.1 million pounds, which was 2.9 percent less than the previous quarter and was 7.0 percent less than a year ago. The complete monthly report is available on the NASS website at <http://www.nass.usda.gov/>.

On April 21, USDA NASS released its monthly *Cold Storage* report. According to the numbers, as of March 31, 2008, beef in U.S. cold storage facilities totaled 424.1 million pounds. This was slightly less than a year ago. More specifically, boneless beef cuts in storage equaled 348.6 million pounds, 4.8 percent lower than a year ago. Beef cuts in storage were 23.8 percent more than last year, amounting to 75.5 million pounds. As of March 31, U.S. pork in cold storage equaled 657.1 million pounds, 32.8 percent more than a year ago. More specifically, hams in storage totaled 89.5 million pounds, which was 55.8 percent higher than last year. The amount of pork bellies in cold storage was 79.4 percent greater than a year ago, amounting to 99.0 million pounds. Loins totaled 48.2 million pounds, up 29.5 percent over a year ago. Ribs in cold storage numbered 83.8 million pounds, little changed from a year ago. Veal in U.S. cold storage facilities equaled 5.6 million pounds, nearly unchanged from last year. Lamb and mutton in cold storage totaled 17.1 million pounds, 7.0 percent higher than a year ago. The complete report can be found on the NASS website at <http://www.nass.usda.gov/>.

NORTH AMERICA (CONTINUED)

On April 18, USDA NASS published its monthly *Cattle on Feed* report. According to the figures, on April 1, 2008, cattle and calves on feed for the U.S. slaughter market for feedlots with a capacity of 1,000 or more head equaled 11.68 million head. This was nearly unchanged from one year ago but was down 1.1 percent from two years ago. This was the second highest April 1 inventory since the series began in 1996. During March, 1.74 million head of cattle were placed on feed, which was 11.4 percent lower than one year ago and was 5.5 percent lower than two years ago. Steers and steer calves on feed totaled 7.35 million head, 1.2 percent less than a year ago. This comprised 62.9 percent of the total. Heifers and heifer calves totaled 4.28 million head, 3.2 percent more than a year ago. More specifically, the number of feeder cattle placed declined from a year ago in each weight category. Placements of feeder cattle weighing less than 600 pounds totaled 335,000 head, 2.9 percent less than a year ago. Placements weighing 600 to 699 pounds declined 12.0 percent from last year, amounting to 330,000 head. Placements weighing 700 to 799 pounds equaled 561,000 head, which was down 12.3 percent from last year. Feeder cattle placements weighing more than 800 pounds totaled 510,000 head, 15.0 percent less than a year ago. In the meantime, fed cattle marketings during March equaled 1.84 million head, which was relatively unchanged from a year ago but was down 5.9 percent from two years ago. To obtain the entire report, visit the NASS website at <http://www.nass.usda.gov/>.

Recently, Statistics Canada released Canada's quarterly *Hog Statistics* report. According to the data, Canada's hog and pig inventory equaled 13.00 million head on April 1, 2008. This was 5.9 percent less than the previous quarter and was 11.7 percent less than a year ago as farmers are leaving the industry due to high feed costs and lower slaughter prices. This was the largest year-over-year decline in three decades and the fifth consecutive quarterly decline. According to the report, as of April 1, Canada had almost 1 in 5, or 19.3 percent, fewer hog farmers than a year ago. Canada's breeding inventory was 1.9 percent lower than the previous quarter and was 4.6 percent lower than a year ago, amounting to 1.50 million head. Sows and bred gilts totaled 1.47 million head. This was down 1.9 percent from the previous quarter and was down 4.6 percent from a year ago. Quebec had the greatest concentration of hogs with 3.85 million head, which was down 13.2 percent from a year ago. This comprised 29.6 percent of the total inventory. The hog and pig inventory in Eastern Canada totaled 7.42 million head. This was 6.0 percent less than the previous quarter and was 10.8 percent less than a year ago. The inventory in Western Canada totaled 5.58 million head. This was down 5.7 percent from the previous quarter and was down 13.0 percent from a year ago. Canada's pig inventory on April 1 equaled 11.50 million head, which was 6.4 percent lower than the previous quarter and was 12.6 percent lower than a year ago. Sows farrowed during the first quarter totaled 809,400 head, 1.8 percent less than last year. This accounted for 54.0 percent of the total inventory. Pigs born during the first quarter of 2008 numbered 8.71 million head. This was 1.2 percent less than a year ago. Canada's hog slaughter during the first quarter totaled 5.17 million head, which was down 1.3 percent from last year. The complete report can be found on the Statistics Canada website at <http://www.statcan.ca/>.

NORTH AMERICA (CONTINUED)

On April 25, USDA NASS published its annual *Meat Animals Production, Disposition, and Income 2007 Summary*. According to the report, during 2007, U.S. total gross income from cattle and calves, hogs and pigs and sheep and lambs totaled \$65.5 billion, which was up 2.2 percent over 2006. During 2007, gross income from cattle and calves equaled \$50.2 billion, up 1.5 percent over the previous year. This accounted for 76.6 percent of the total gross income. Gross income from hogs and pigs increased 4.9 percent over 2006 to \$14.8 billion. During 2007, the gross income from sheep and lambs equaled \$505.4 million, little changed from 2006. During 2007, marketings of cattle and calves totaled 54.8 billion pounds, slightly higher than 2006. Marketings of hogs and pigs increased 3.7 percent over 2006 to 30.3 billion pounds. Sheep and lamb marketings equaled 575.2 million pounds, which was down nearly 1.0 percent from 2006. During 2007, the U.S. annual average price per 100 pounds live weight for cattle totaled \$89.90, which was up from \$87.20 in 2006. The average price for calves in 2007 was \$119.00, down from \$133.00 in 2006. The average price for hogs and pigs was \$46.60, slightly higher than \$46.00 in 2006. The average price for sheep in 2007 was \$31.00, down from \$35.20 in 2006. During 2007, the average price for lambs totaled \$98.50, up from \$95.50 in 2006. The entire report, which also includes information on cash receipts, production, inventories, births, deaths and home consumption, is available on the NASS website at <http://www.nass.usda.gov/>.

to 56,736 MT. Meanwhile, South Korea's pork imports during March soared 34.8 percent higher than the previous month to a record 33,666 MT. Also, this was 11.2 percent higher than March 2007. During March, South Korea imported 11,274 MT of pork from the U.S., which is a new monthly record. This was 50.4 percent greater than the previous month and was 28.6 percent greater than March 2007. South Korea's first quarter pork imports from the U.S. equaled 28,399 MT, 15.5 percent above a year ago. The U.S. was the main supplier of pork to South Korea with 31.3 percent of the total imports. During March, South Korea imported 4,742 MT of pork from Canada. Although this was up 14.4 percent over the previous month, it was down 15.5 percent from March 2007. Total year-to-date pork imports from Canada were 13.5 percent lower than last year, amounting to 13,626 MT. Pork imports from Chile during March rose 28.9 percent over February and 50.4 percent over March 2007 to 4,467 MT. During the first quarter, South Korea imported 13,463 MT of pork from Chile, which was 60.7 percent more than last year. Overall, South Korea's total first quarter 2008 pork imports equaled 90,814 MT, 4.8 percent above the corresponding period a year ago. Further data from South Korea is available on the KITA website at <http://www.kita.org/>.

The Korea International Trade Association (KITA) recently published South Korea's beef and pork import data for March 2008. According to the data, South Korea's beef imports during March rose 14.3 percent over the previous month to 17,692 MT. However, this was down 7.5 percent from March 2007. More specifically, frozen beef imports equaled 15,260 MT, accounting for 86.3 percent of the total. Fresh, chilled beef imports equaled 2,432 MT, of which Australia accounted for 92.0 percent. During March, South Korea imported 12,578 MT of beef from Australia. This was up 24.3 percent over February but was down 8.9 percent from March 2007. During the first quarter of 2008, South Korea's beef imports from Australia were 2.0 percent less than a year ago, amounting to 40,625 MT. Australia was the main source of South Korea's beef imports with 71.6 percent of the total. During March, beef imports from New Zealand totaled 4,588 MT. This was 6.4 percent lower than the previous month and was 6.2 percent lower than March 2007. Total first quarter beef imports from New Zealand equaled 14,272 MT, 5.1 percent above a year ago. Overall, during the first quarter of 2008, South Korea's beef imports were nearly 1.0 percent more than the same period a year ago, amounting

OCEANIA

The Australian Lot Feeders' Association (ALFA) and Meat & Livestock Australia (MLA) recently issued the results of Australia's first quarter cattle on feed survey. According to the numbers, Australia's cattle on feed equaled 604,026 head on March 31, 2008. This was 3.3 percent more than the previous quarter, reflecting slightly improved trading conditions in Australia. However, this was 30.8 percent less than a year ago. The majority of Australia's cattle on feed were located in Queensland, which had 277,159 head of cattle on feed. This accounted for 45.9 percent of the total. Queensland and New South Wales together had 484,059 head, or 80.1 percent of the total. Cattle on feed destined for the domestic market equaled 184,367 head. This was up 15.1 percent over the previous quarter but was down 30.0 percent from a year ago. Cattle destined for the export market totaled 416,860 head, which was nearly unchanged from the previous quarter but was down 27.9 percent from a year ago. During the first quarter of 2008, Australia's feedlot capacity totaled 1,186,966 head, a new record. This was 3.0 percent more than the previous quarter and was 5.2 percent more than a year ago. Queensland had the greatest feedlot capacity with 565,010 head, which accounted for 47.6 percent of the total capacity. During the first quarter, Australia's cattle marketings fell 7.3 percent from the previous quarter and 32.3 percent from a year ago to 464,148 head. The entire report is available on the ALFA website at <http://www.feedlots.com.au/>.

SOUTH AMERICA

According to U.S. Meat Export Federation (USMEF), Argentina is set to resume its exports of beef after the government reached an agreement with producers. The agreement will allow producers to export 550,000 MT of beef. The previous agreement was 480,000 MT. The agreement secures 13 common cuts for domestic consumers at prices set in January. The export limit does not apply to beef from cows for processors. Argentina suspended beef exports for several months in 2006, with Hilton cuts to Europe being exempt. The ban was later replaced by monthly limits.

RUSSIAN FEDERATION

According to the USDA Foreign Agricultural Service (FAS), Russia's distribution of all beef and pork tariff rate quotas (TRQ) was completed on April 14. The allocation was based on full-year import data. The U.S. received an allotment for beef of 18,300 MT and allotment for pork of 49,800 MT. To read the report, visit the FAS website at <http://www.fas.usda.gov/>.
